

Why Volunteer?

Volunteering is a great opportunity to gain skill and experience working in an environment to build confidence which may lead to a new career pathway for the future. You get to work with various skilled individuals and gain hands-on experience in the environment you work in. You have the opportunity to take responsibility if interested while accessing various training resources to increase your knowledge and confidence.

At **Starpic Project** we provide university and college students a placement within our delivery team both in school and the youth project which has been a great success since our placement partnership started in 2022.

You can start our volunteer programme from the age of 16 years, we offer to discuss a development plan to help your journey towards a more positive destination which is reviewed every 20 weeks with yourself and the coordinator.

Some individuals like to volunteer as a means to 'give back to the community', as they value the importance of working with young people, as some volunteers have a full time job and like to volunteer within the community, others may be looking to build personal skills and knowledge and appreciate the opportunity to volunteer as part of the Starpic Project team.

All volunteers will become a member of the PVG scheme through Starpic Project and will have access to training as part of their time at Starpic Project which is all **FREE**.

Next step is to complete the online application form <https://www.starpicproject.co.uk/vacancies/>
